I can now be sure that the site will welcome our dog, and we can plan ahead enough to know we are prepared, know where to go, and that we have no surprises. It

includes great planning guides for location, hike distance and duration, elevation change charts, who to call for questions, and unique features in the park. There is also a good section covering topics which help insure your dog is prepared, and will not experience any ill health effects from the hike. 0 of 0 people found the following review helpful.
