the Map People ADC : Bike Map Washington DC Region before purchasing it in order to gage whether or not it would be worth my time, and all praised Bike Map Washington DC Region:

picked by "experienced cyclists". The map does not show actual bike lanes on streets! For example, it doesn't show any bike path on 15th street NW. Since I wanted a map of bike lanes, I found this map very disappointing but it may have gold scenic routes outside the city.0 of 0 people found the following review helpful. Just covers the I-495 areaBy charles murphyIt's fine for its intended use. I was hoping for something that covered the whole metro DC area, out to suburbs a number of miles out. The description does not tell specifically what area the map covers. Note this, if you're wondering: The area covered by the map is basically what's within I-495 plus a little bit outside the beltway.0 of 0 people found the following review helpful. Comprehensive MapBy Ian K RodgersThis map has a comprehensive list of bicycle routes across the region. Its very useful to see all the rides you can do and how to reach to the great sights.
