There was a Nature trail by the lake, name I have forgotten!, that yielded a lot of good birds. But the gorge/bridge was good too and several other spots. I recommend it.0 of 0 people found the following review helpful. Superb Resource for Birding New MexicoBy Kindle CustomerThe writer has done good research and offers excellent directions and bird finding for Northern New Mexico. Well written and researched. Long needed and very welcome.0 of 0 people found the following review helpful. Great Birding Book for the NM AreaBy Anne DutchmanBraneGreat resource! Looking forward to going to the sites listed. We're campers, so we love that the book gives information on whether camping is available.

In their second guide to birding in New Mexico, Judy Liddell and Barbara Hussey share their experiences and intimate knowledge of the best places to find birds in and around Santa Fe and other areas in northern New Mexico. Following the same format as their book on the Albuquerque area, the authors describe 32 sites organized by geographic regions. Along with a general description of each area, the authors list target birds; explain where and when to look for them; give driving directions; provide information about public transportation, parking, fees, restrooms, food, and lodging; and give tips on availability of water and picnic facilities and on the presence of hazards such as poison ivy, rattlesnakes, and bears. Maps and photographs provide trail diagrams and images of some of the target birds and their environments. A helpful information section covering weather, altitude, safety, transportation, and other local birding resources is included along with an annotated checklist of 276 bird species seen with some regularity in and around Santa Fe.

Birding Hot Spots of Santa Fe, Taos, and Northern New Mexicoincludes everything but binoculars! Highest praise and appreciation to Judy and Barbara for their meticulously researched, lovingly detailed, and expertly written guide. . . an absolute must have for any birder.Jan Saunders, author ofBird Notes from the Galisteo Basin
