Roland H. Wauer : Birds of the Northwestern National Parks: A Birder's Perspective before purchasing it in order to gauge whether or not it would be worth my time, and all praised Birds of the Northwestern National Parks: A Birder's Perspective:

From the bald eagle to the pileolated woodpecker, the varied and abundant birdlife of the northwestern national parks

is as impressive as the parks' dramatic scenery. To help both beginning and advanced birders make the most of their visits to these parks, Roland Wauer has written this finding guide, which introduces the most common birds and the most likely places to see them. The book opens with practical advice on getting started in birding—choosing binoculars, bird identification, proper field techniques, etc. Then after a concise discussion of the national parks as "islands" of bird habitat, the succeeding chapters fully describe each park, including its plant and animal communities and the facilities and interpretive activities available to visitors. Wauer takes readers on "walks" through each park's most popular and accessible places, where he explains the identification and behavior of the birds that visitors are most likely to see. He closes each account with a review of the park's bird life and a list of key species. Pen-and-ink drawings illustrate many of the birds.

"I can't recall reading a book that makes birding seem more attractive....I look forward to getting a copy and using it." (Bob R. O'Brien, author of *Our National Parks and the Search for Sustainability*) "I can't recall reading a book that makes birding seem more attractive....I look forward to getting a copy and using it." (Bob R. O'Brien, author of *Our National Parks and the Search for Sustainability*)
About the Author
Roland H. Wauer, of Victoria, Texas, enjoyed a 32-year career as a National Park Service interpreter, biologist, and Chief of Resource Management. He is also the author of *The American Robin*, *A Birders West Indies: An Island-by-Island Tour*, and *For All Seasons: A Big Bend Journal*.
