reference!By A. DerWonderful book and hard to find. I live in the area and it is a great reference. Wish it was still in print and updated.

Exhaustively researched and referenced, this book details the distribution, status, abundance and habitat of every species known to occur in the Yosemite-Mono County region. The text is complemented by superb line drawings and B/W photos of rarities. The second printing was updated to 1992.

About the AuthorAudubon Magazine recently honored David as one of the 100 people who shaped the environmental movement in this century. A birder as a youth, he carried his enthusiasm and dedication to the environment until his early death in 1988. He may be best known as the founder of The Mono Lake Committee. He was very familiar with the birds in this region from teaching many classes and field trips, and conveys that knowledge in his lucid prose.
