14 of 15 people found the following review helpful. Good information By Bible packer Mors Kochanski is one of the understated "dirt teachers" of this era. Since he specializes primarily in the further Northern regions, and COLD climate survival he has not received the widespread reputation of many others more diverse instructions. Still his life experience in the most inhospitable climes of the frozen North is the best available. His blending of modern materials

with "old wisdom" puts him in a unique place between the die-hard traditionalist and the modern materials ultra-lite obsessed outdoors person. His idea for the "super shelter" combinations these two worlds all with one goal in mind- safest and most enjoyable enjoyment of the wilderness. Good read with Common Sense approach to getting away from modern "civilization". 4 of 4 people found the following review helpful. Very informative and practical. This is the second book ...By Western Ridge Very informative and practical. This is the second book I have read from this seasoned author who writes from hard earned experience. More detailed than the casual reader may want but if you spend significant time in the wilderness the information is priceless. 4 of 4 people found the following review helpful. Five Stars By trowland One true bible for outdoor living.
