By Betty TI am never the type of hard working traveller who would dig into lengthy travel books to find out everything. I found this book very useful for me. It's all in color (so, it's a pleasure to read, though that makes it heavy), and it has great maps which highlights all attractions in addition to detailed maps in the end of the book. That keeps me focus on what I want in a very easy way, instead of searching for where that particular attraction is. I went to San Francisco, and places as far as 3 hours driving to north, and 4 hours driving to south. For San Francisco part, this book even included different architecture style, which greatly enhanced my experience. As for others, most of the places they describe, they include pictures also. This helps me to know what to expect. Though I don't like it to be so heavy, it's my favorite among my collection.

By Dianne SawyerThis is a good quality, comprehensive travel guide that not only has concise street guides, photos and a variety of places to see in cities up and down California, it also includes historical information, places to eat, stay and shop. I highly recommend it.
