Robert Burns : Doing Business in Asia before purchasing it in order to gage whether or not it would be worth my time, and all praised Doing Business in Asia:

0 of 0 people found the following review helpful. I can not rate this book highly enough. For those that have just started in Asia or those with single country experience, thisBy Tony J. Ridley"I can not rate this book highly enough. For those that have just started in Asia or those with single country experience, this book will give you valuable

insight and support for navigating and understanding Asian corporate culture. Even though it is over a decade since first print, extracts on specific cultures are timeless and extremely intuitive. If you're totally in the dark then this book will be your light source for doing business and managing people capital in Asia. Don't think it has all the answers but the best single location for wisdom on the subject I have found to date. "

This is a guide to doing business in Asia for Western business people and public sector professionals who are working within the Asian region.
