John Tauranac : EMPIRE STATE BUILDING: The Making of a Landmark before purchasing it in order to gage whether or not it would be worth my time, and all praised EMPIRE STATE BUILDING: The Making of a Landmark:

1 of 1 people found the following review helpful. Not what I expectedBy Cat on a PCI was expecting a book along the lines of Skyscraper: The Making of a Building by Karl Sabbagh. It tells the story of the construction of Worldwide Plaza. However, there is really very little in Tauranac's book about actually building, with only one chapter devoted to

the actual construction. A shame, really, as some of the techniques used were pioneering at the time. This is not to say that this is not a good book. It does give an overall history of the development of the urban landscape in Manhattan during this period. If you're looking for a book about the era that produced a landmark building, then this is the book to get. However, if you're looking for something about the Empire State Building detailing its actual construction, then you won't find it here. 1 of 1 people found the following review helpful. An excellent book about a monumental project -- with only one flaw. By Harlan Lebo This is a superb book -- an extremely readable account of the building of America's greatest skyscraper. The only flaw in the book is that in an otherwise crystal-clear book, Tauranac uses too many terms from architecture and construction without explaining them. The book is still perfectly appropriate for a lay audience, but it would have been even better if I had the context that understanding these terms would provide. 0 of 0 people found the following review helpful. Early days of the Boom in Manhattan! By WBJJ Very interesting and enjoyable for the most part. May be too detailed for some readers (thus only four stars), but it is non fiction and informative regarding the early New Yorkers making their fortunes.

A fascinating combination of architecture and cultural history offers a comprehensive chronicle that captures the excitement and politics involved in the building of the Empire State Building, the technological breakthroughs of its construction, and more. 15,000 first printing.
