I knew I loved Eye-Witness Travel Guides,I'm absolutely hooked on their incredibly useful method of presentation, but this is the first time I return to a place I once lived and used one of their guides. What a "Eureka" moment! Using their pictorial presentation of maps and sights, I "SAW" New York in its entirety for the first time. The overview and breaking down of the city into sections gives the tourist total control of the situation.I highly recommend this book for the sights and maps.The restaurant recommendations were not very good. After the amazing recommendations in their Budapest and Paris Guides, this list was a disappointment. Buy a different Restaurant and Hotel guide, but use this to get around and make the most of your time.1 of 1 people found the following review helpful. Great photosBy A CustomerI bought this and the Fodor's and only used this one. I love the pictures - they really help a lot. They also group everything by neighborhood and give a colored map so you know what streets are included.I definitely recommend this guidebook.19 of 20 people found the following review helpful. Four Weeks in New YorkBy Maggie SmithI am planning to spend four weeks in New York in your summer, my winter. Wanting to buy a good travel guide I went to the largest book shop in Melbourne (AU). With a choice of around 100 books - this book stood out. Concentrating more on what to do and see than the usual 'where can I stay for under \$50 a night'or want a plethora of restaurant this book took me into the galleries, museums and architecture delights of New York. I feel it is designed for the traveller who wants to jump in boots and all. Thanks to this book I know my four weeks will be filled with exploring this fascinating city. Best book to get.
