Salvatore Michael Trento : Field Guide to Mysterious Places of the Pacific Coast (Field Guide to Mysterious Places Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Field Guide to Mysterious Places of the Pacific Coast (Field Guide to Mysterious Places Series):

Like the riveting TV show *The X Files*, scientist Sal Trento investigates bizarre unexplained phenomena, but unlike the TV show, Trento directs readers to real places of mystery, ancient and new, ready for exploration by anyone with an open mind. Trento leaves no stone unturned in his quest for the origin and meanings behind the myths. 180 illustrations.
