As a former Disney theme park/studio employee and the son of a Disney Imagineer, the author has collected confidential strange stories from Cast Members and Imagineers over the past two decades. Many books have been written about the history, secrets, and design of Disneyland, but this guide looks at the California landmark from a different angle. It explores the little known ghost tales and strange folklore surrounding this famous tourist destination, and offers new insights into this beloved theme park.

About the AuthorMr. Carradine has researched ghosts from all over the world, (Canada, Scotland, England, Wales, Austria, Czech Republic, and Slovenia) and throughout the United States (Florida, California, New York, Louisiana, Virginia, and Montana). In California alone, he has explored hundreds of haunted locations. His approach to each case is academic. Proving or disproving the spiritual activity of a certain spot isn't what motivates this ghost hunter. Instead, he is more interested in collecting the stories and eyewitness accounts, and archiving them, as a means of recording them for future studies into these unusual phenomena that clearly affect so many seemingly unconnected people.
